Skills

I distinguish myself from others via my exceptional work ethic as i've been told from all of my previous employers,as well as displaying my ability to proficiently work well with others in a cooperative and professional manner.I have a consistent high spirited attitude towards all my lines of work with a constant sense of urgency for everything i'm tasked with.I am Proficient in html,css and javascript along with a deep understanding of C++ and C# as well as python.I have done plenty of work microsoft Access and mySQL . Also I'm bilingual in english and in the french languages with a DELF A2 certificate for the french language.

Experience

Sept 2019 - January 2021
Routeique, Calgary – *Software Developer*

Both positions required me to use Jira for project tracking and bitbucket/sourcetree as well as GIT for repo management.

Iot Developer:

- Worked on the Vehicle Intelligence Hub (VIH) which was a linux(Ubuntu) system running on the python language.

  Web Developer:

- For databases I used mySQl as our main database while laravel as out framework.

- For developing our sites we primarily used React and Php, with a combination of Html, css, javascript, and typescript. I also became very familiar with varying Amazon Web Services(AWS), like cloudwatch and Iot Core.

June 2015 - April 2017
Dewinton Pet Clinic, Dewinton – *Vet Assistant*

- Large amounts of cleaning and deep cleaning specific pieces.

- Heavy amounts of file sorting and organization applied to client information(working with excel included).

April 2017 - August 2017

Bridlewood Vet Clinic, Bridlewood,Calgary – *Receptionist/Vet Assistant*

- Primarily, held reception and Client assistance.
- Relatively large amounts of inventory done and customer service.

June 2018-August 2018

Lowe's *- Loader*

- Primarily,manages the canopy area, loading zone.Sufficient with multiple tools but primarily used panel saw and staple guns for various needs.
- Which involves maintaining fully stocked homes and heavy labor.
